# SEWING INSTRUCTIONS

Embroidery Design

Stopping just short of the edge

1. Choose a 4"x4" embroidery design. Hoop up the front fleece material with some cut-away stabiliser and embroidery your design onto it.

2. Place the right side of the front side fleece to the front of the blanket. Stitch a line starting at the top but finish 1/4" before you meet the bottom of the front fabric edge.

Repeat - Stop stitching just before the edge
3. Fold the first side fleece of fabric up where you've left the gap of stitching. Now attach the next colour of fleece to that edge, stitching until you are 1/4" away from the corner.
Finish this stitching edge
4. Turn this upside down and now finish the stitching line on the first side fleece with the second side fleece.
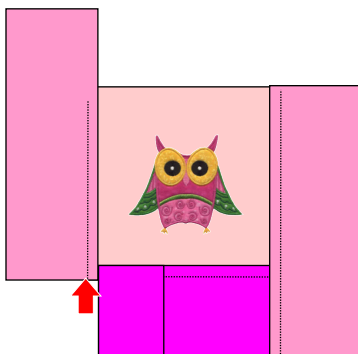

5. Repeat step 3 attaching the third colour of fleece.
Finish this stitching edge
6. Repeat step 4 stitching the next side of fleece together.

7. Once you get to the fourth fleece side, repeat steps 3 but you can now stitch all the way to the edge.

Finish this stitching edge

8. Repeat steps 4 by turning over and stitch closed this last fleece side edge.

9. Get the Fleece colours tabs and fold them over. Stitch two lines down each side. Then fold them inside out to create your finished tab. Repeat for all of your tabs (except for the teething ring tabs).
10. If you plan on including two teething rings into your blanket then cut out 2 x fleece. Place them together with the rights sides facing. Stitch down both sides. Now turn these inside out.
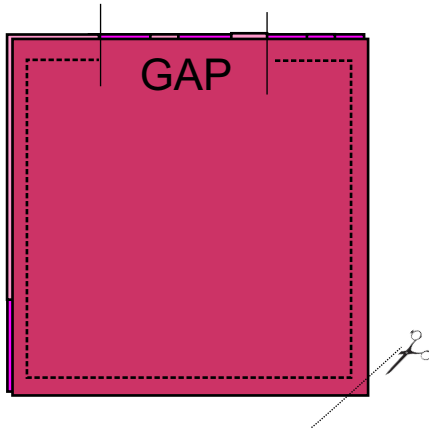

11. We are going to fold these two tabs over the two teething rings as shown.
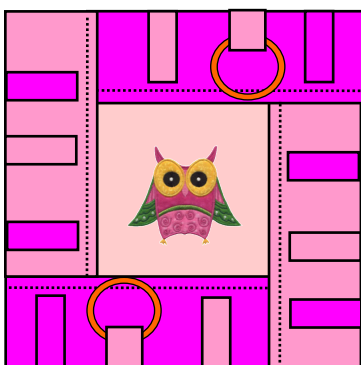

12. Now place the tabs down onto the edge of your security blanket front. Make sure that the rough edge meets the rough edge of the material.
7. Now place the right sides of the fleece back to the right side of the security blanket front.

7. Now stitch 1/4 around the edge of the blanket leaving a 10cm gap on one of the edges, as shown. Trim any excess tabs and cut the edges of the corners.

GAP
7. Pull the blanket inside out, through the gap. You can now hand stitch the gap closed, or run a stitch line around the outside of the blanket close to the edge. Iron all the edges flat. You have now completed your baby security blanket.
