

# Baby Lock brings you innovations to revolutionise your overlocking

Since 1967, Baby Lock has been at the forefront of delivering the latest technology to the domestic overlocker market. Our range of Combination Overlocker/Coverstitch machines represent the pinnacle of Baby Lock ingenuity.

## ExtraordinAir™ & JetAir™ Threading – Instant threading of all loopers

Overlockers are renowned for being difficult to thread. There are usually anywhere between 20 to 30 threading points which need to be threaded in a specific order each time a thread breaks or a different colour is required. This process is complicated, troublesome and time consuming and can result in many annoyances including twisted threads and constant thread breakage.

**The Baby Lock ExtraordinAir™ and JetAir™ Threading Systems eliminate these problems.** With these exclusive systems, threading can be completed in less than ONE minute. Imagine how much time you will save if you don't have to worry about threading!

Simply insert threads into the threading ports, press the button (ExtraordinAir™ Threading) or lever (JetAir™ Threading) and a blast of air shoots the threads through the loopers, threading them instantly. How easy is that?

## Tubular Loopers

ExtraordinAir™ and JetAir™ Threading work in conjunction with Baby Lock Tubular Loopers. These allow you to thread in any order, and threads no longer tangle, as they are not exposed. No more thread guides, and no more threading problems!

## Automatic Thread Delivery System (ATD) – No more tensions!

Most overlockers rely on a tension system to give you a perfect stitch. If you have ever used an overlocker you will know that tension tuning is a nightmare. A complex ritual of dial adjustments is required to create a balanced stitch, and this needs to be performed every time you change fabric or thread. What a waste of time!

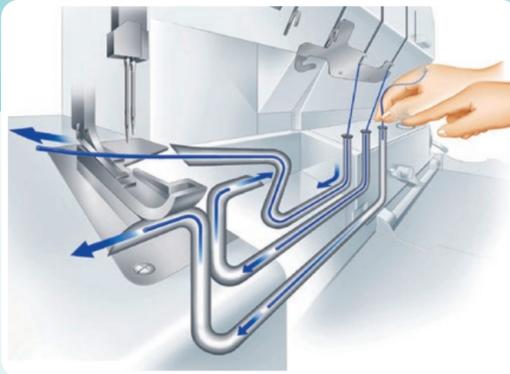

**Baby Lock overlockers take the tension out of sewing.** The Automatic Thread Delivery (ATD) System delivers a length of thread to form a balanced stitch instead of putting tension on the thread. You simply select A, B, C or D depending on the stitch desired.

Now you can stitch on any fabric with any type of thread. Sew from one fabric type to another without skipping stitches. Say goodbye to tensions.

**EXTRAORDINAIR™**  
THREADS IN A BREEZE

**JETAIR™**  
THREADING

**ExtraordinAir™ & JetAir™ Threading allows you to:**

- 1 Thread in any order
- 2 Thread the entire machine in less than one minute
- 3 Change any thread without re-threading the others
- 4 Stop worrying about tangled threads!

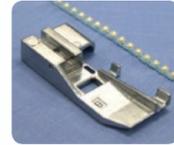

**Unrivalled Quality & Durability**

Baby Lock machines made in Japan are renowned world-wide for their outstanding innovation, technology, build quality and durability. This gives us the confidence to offer a 5 year conditional parts and labour warranty on Combination Overlocker/Coverstitch machines.

## Features of all Baby Lock Combination Overlocker/Coverstitch Machines:

- **Automatic Thread Delivery (ATD)** system
- **Overlocking options** using 2 to 8 threads
- **Tubular loopers** prevent thread tangling
- **Vertical needle system** minimises needle deflection
- **Overlock stitch functions** to seam & encase fabric edges
- **Flatlock stitch functions** for seaming & decorative effects
- **Coverstitch options** – triple coverstitch, double wide (6mm), double narrow (3mm) & single chain stitch
- **Heavy duty cutting system** cuts thick fabrics with ease
- **Full range differential feed** – ranging from 0.6 to 2
- Ability to continually chain off with coverstitch needles
- **Adjustable stitch width** – ranging from 1.5mm to 7.5mm on overlocking & up to 16mm using coverstitch & overlock combined
- **Adjustable stitch length** – 0.75mm to 4mm
- Easy to follow colour-coded threading chart
- Built in thread cutter & accessory storage
- **Needle System** ELX705CF #12/80 & #14/90
- **5 year** conditional parts & labour warranty
- **Made in Japan** – quality & durability

## Ovation

Flagship of the Baby Lock range, with unparalleled features – from the largest workspace available to its 6 LED Lights, Variable Speed Control and Knee-lift – ensuring your overlocking and coverstitching is elevated to a higher level.

**Powerful LED Illumination**  
6 LED Lights give your workspace a bright and even light.

**Removable Knee-lift**  
Maintain complete control with hands-free operation of the presser foot lifter.

**Industry-leading Throat Space**  
Give your projects the space they deserve.

**Variable Speed Control**

**Front-mounted Presser Foot Lifter**  
No more fumbling at the back of the machine.

**Adjustable Presser Foot Pressure**  
Easy and convenient dial control.

**Convenient Built-in Storage** – All models

## Additional Ovation Features

- ExtraordinAir™ Threading – all loopers thread in a breeze
- Over 5-inch (130mm) throat space
- Variable speed control – ranging from 530 to 1300 stitches per minute
- Knee-lift (removable)
- 6 LED lights
- 87 stitch options
- Exclusive wave stitch & reverse wave stitch
- Needle screw guard prevents needle screws being lost
- Presser foot lifter located on the front of the machine
- Ability to use quilting guide
- Snap-on multi-purpose foot with 3 slots for ribbon & tape guides
- Safety switches connected to front door & side cover
- Machine weight – 12.5 kg

See available accessories & compare model specifications on the back page

**ExtraordinAir™ Threading** – Ovation & Evolution Only  
Simply push the button and air blows the thread through the tubular loopers.

## Evolution

## Additional Evolution Features

- ExtraordinAir™ Threading – All loopers thread in a breeze
- 87 stitch options
- Exclusive wave stitch & reverse wave stitch
- Pure lighting system with 3 LED lights
- Snap-on multi purpose foot with ribbon & tape guide
- Safety switches connected to front door & side cover
- 1500 stitches per minute
- Machine weight – 8.5 kg

See available accessories & compare model specifications on the back page

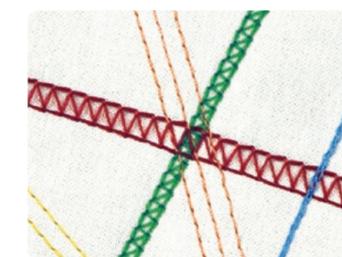

**Exclusive Wave Stitch & Reverse Wave Stitch**  
Ovation & Evolution Only – Add a new level of creativity to your projects.

**Full Range Differential Feed** – All models  
Ranging from 0.6 to 2
