

Meet your **NEW** sewing & embroidery bestie!

Hi, I'm Brother's new M370. Let's get to sew each other better!

Scan me to learn more!

What can we sew together?

Everything! Denim, upholstery, costumes, curtains and pleather – my powerful computerised motor handles all.

I love stretch fabrics like Lycra and jersey. My stretch stitches are designed to flex.

I'm great for quilting too. I have stitches for piecing and appliqué and you can drop my feed dogs.

Getting started just got easier

Let me thread the needle for you. Just press my thread lever and I will pull the thread through the eye of the needle.

I'm neat and tidy. When you are finished, I trim the threads for you.

I have a speed controller that can slow things down and make it easier to control your stitching.

You can watch my handy videos online if you need help along the way.

Let's talk embroidery!

I come with a 100 x 100mm hoop to match my 100 x 100mm embroidery area.

Editing is easy on my 3.7 inch colour touchscreen. Move, resize, rotate, combine designs and more.

I have 135 built-in designs, along with 11 fun fonts to add names lettering to your projects.

Why use a machine with Wi-Fi?

So you can send embroidery files from your mobile or PC into your machine. Brother's free Artspira App and Design Database Transfer¹ software make it easy. You still can use a USB if you want to.

¹ Compatibility may vary by device and operating system. Requires connection to a wireless network.

What can we embroider on?

Embroider monograms, lettering and motifs on towels, bathrobes and customise childrenswear. Create personalised gifts, craft one-of-a-kind badges, or even small in-the-hoop purses and swing tags. The list is endless.

I'm built to last

I come with a 5 year electrical / 3 year mechanical warranty.

My powerful motor happily keeps up with your heavy-duty sewing.

I have a robust metal frame inside for stability.

Innov-is M370 Sewing & Embroidery Machine
