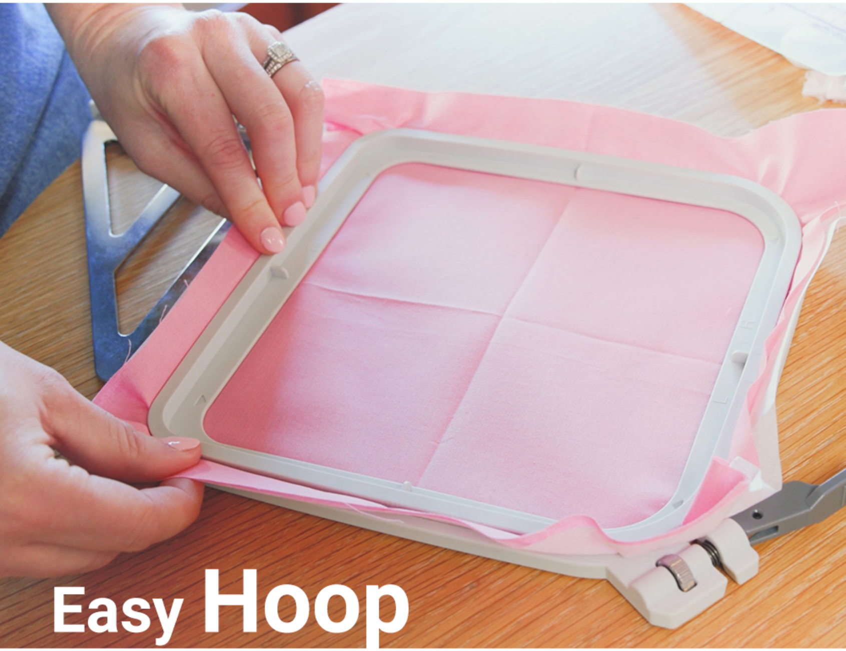
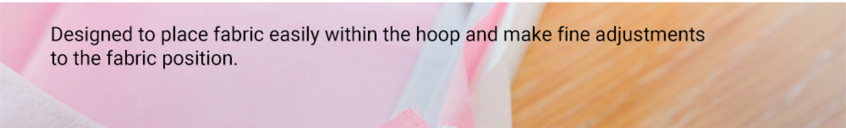
There's ample room for creativity with Memory Craft 1000.

Embellish clothing and quilts or create heartfelt gifts with a large embroidery field of 140 x 140 mm, all in a powerful and compact machine.



Easy Hoop Tightening System



Designed to place fabric easily within the hoop and make fine adjustments to the fabric position.

You can adjust the
tightness of the hoop with
the thumb roller wheel.

Memory Craft 1000

The Memory Craft 1000 gives you ample adjustability for your own unique embroidery flare.

At the touch of a screen, you can easily resize, zoom, flip, rotate, copy/paste, arc, group colours, single colour stitch, corner layout, change sewing order, adjust grid line display and much more.

Sewing and embroidering. Hand in hand.

Blind Hemming pants? Decorating upcycled garments? Making baby

quilts?

With 300 general sewing stitches within 16 selectable groups, there is always the right stitch for your project.

Plus, we've added 11 new stitches across 4 stitch categories!

Easy threading. Janome's latest Superior Needle Threader 2 ensures the thread is pulled through the eye of the needle fully, every time. Now that's bull's eye.

Never run out of bobbin thread. The Optical Bobbin Sensor will let you know you're out of thread. Better yet, it minimises wasted thread left on your bobbin.

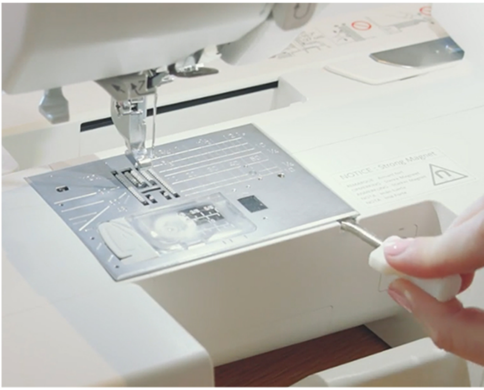
Bobbin thread is not sufficient.
Bobbin winding is necessary.

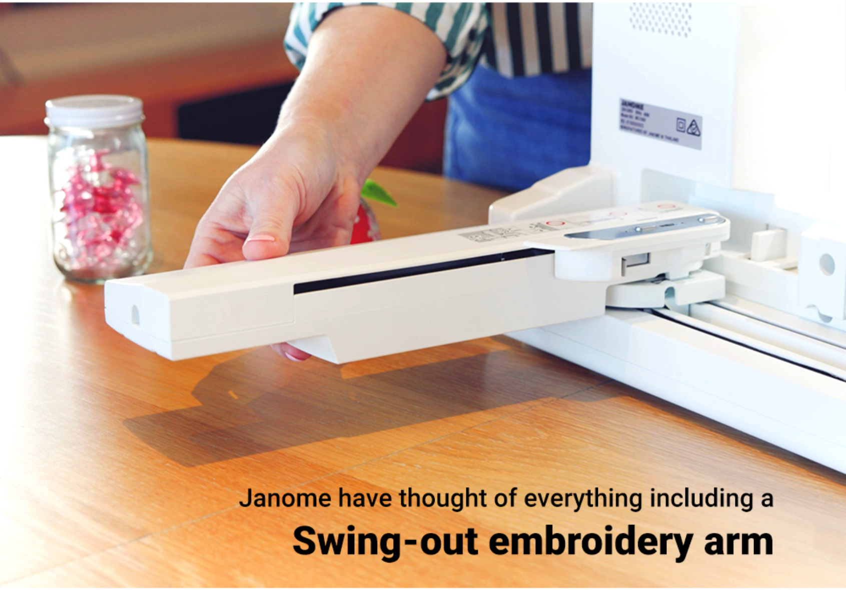
Need to swap needle plate?

With the Magnetic Needle Plate conversion, simply place the standard screwdriver into the release port and push the needle plate up.

The plate pops up effortlessly, allowing you to replace your straight stitch needle plate, or getting access to the bobbin area for cleaning.



The Memory Craft 1000 is pretty clever too with needle plate detection, meaning it knows what needle plate you have on the machine and will only allow you to select the relevant stitches. No more selecting the wrong stitch and breaking a needle!



Janome have thought of everything including a

Swing-out embroidery arm

This allows for free-arm capability enabling easy embroidery on sleeves, pockets, socks.

And a bonus to that is a compact foot print! The size of the Memory Craft 1000 is actually smaller than a piece of A3 paper, yet offers a large workspace of 180mm to the right of the needle.

JANOME
Memory Craft 1000

The Memory Craft 1000 features a solid Aluminium Diecast Frame for stability, minimal noise and vibration, optimal stitch quality and maximum workspace.

Its innovative construction and technology makes the machine lightweight yet sturdy. At just 10kg, Memory Craft 1000 is manageable and easy to transport to classes and retreats without compromising on quality.
