A Little Creativity Can Spark BIG Ideas

Introducing The New JANOME Memory Craft 100E

There's ample room for creativity with Memory Craft 100E.

Embellish clothing and quilts or create heartfelt gifts with a large embroidery field of 140 x 140 mm, all in a powerful and compact machine.

Easy Hoop Tightening System

Designed to place fabric easily within the hoop and make fine adjustments to the fabric position.

You can adjust the tightness of the hoop with the thumb roller wheel.

3.5" High-Definition Colour LCD Touch Screen

The Memory Craft 100E offers clear and concise images without reflections or darkness on acute angles. It provides quick refresh time and better colouring for optimal image quality – just like what you would see on your smart phone or TV.

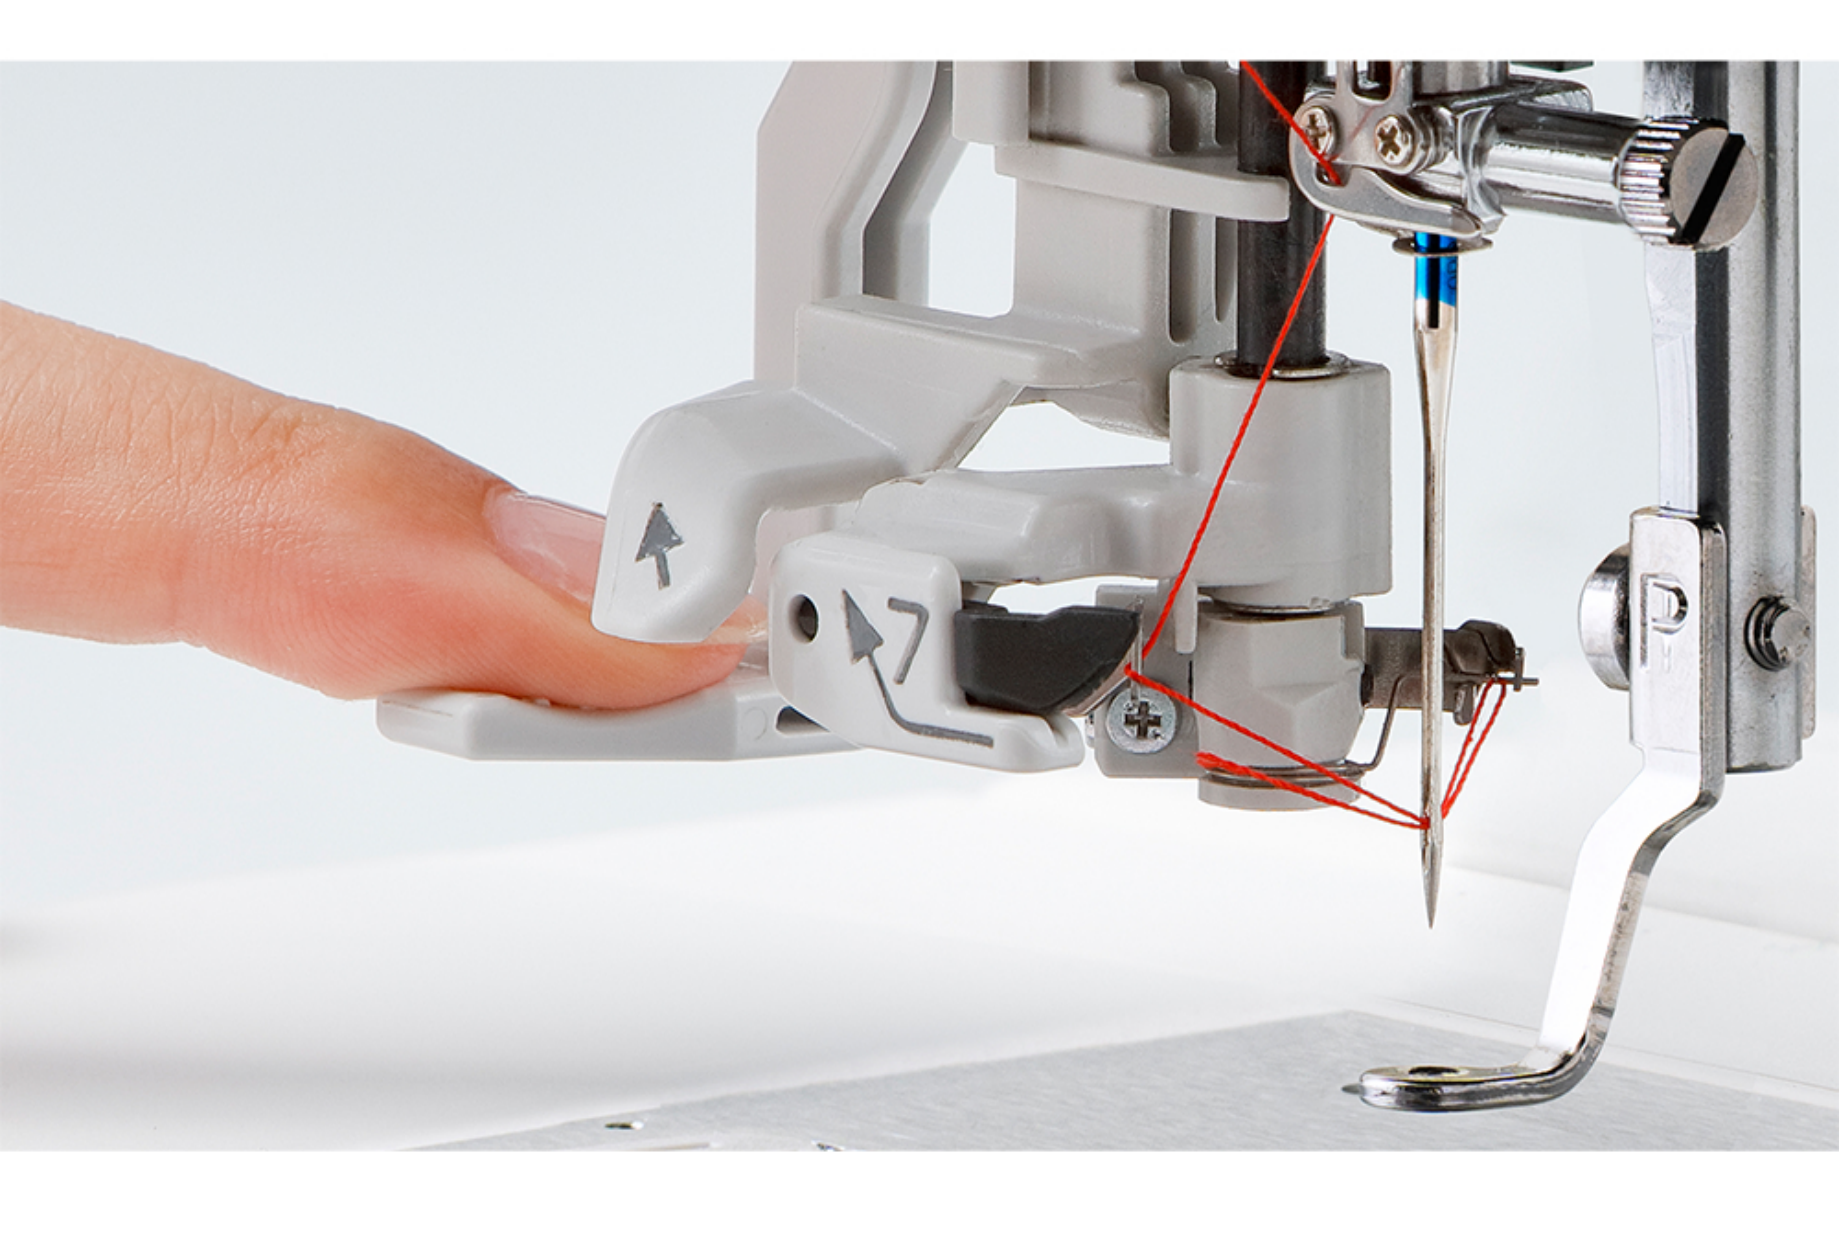
The Memory Craft 100E gives you ample adjustability for your own unique embroidery flare.

At the touch of a screen, you can easily resize, zoom, flip, rotate, copy/paste, arc, group colours, single colour stitch, corner layout, change sewing order, adjust grid line display and much more.



Easy threading. Janome's latest Superior Needle Threader 2 ensures the thread is pulled through the eye of the needle fully, every time. Now that's bull's eye.

Never run out of bobbin thread. The Optical Bobbin Sensor will let you know you're out of thread. Better yet, it minimises wasted thread left on your bobbin.

Utility (U)-1/3

Bobbin thread is not sufficient.
Bobbin winding is necessary.

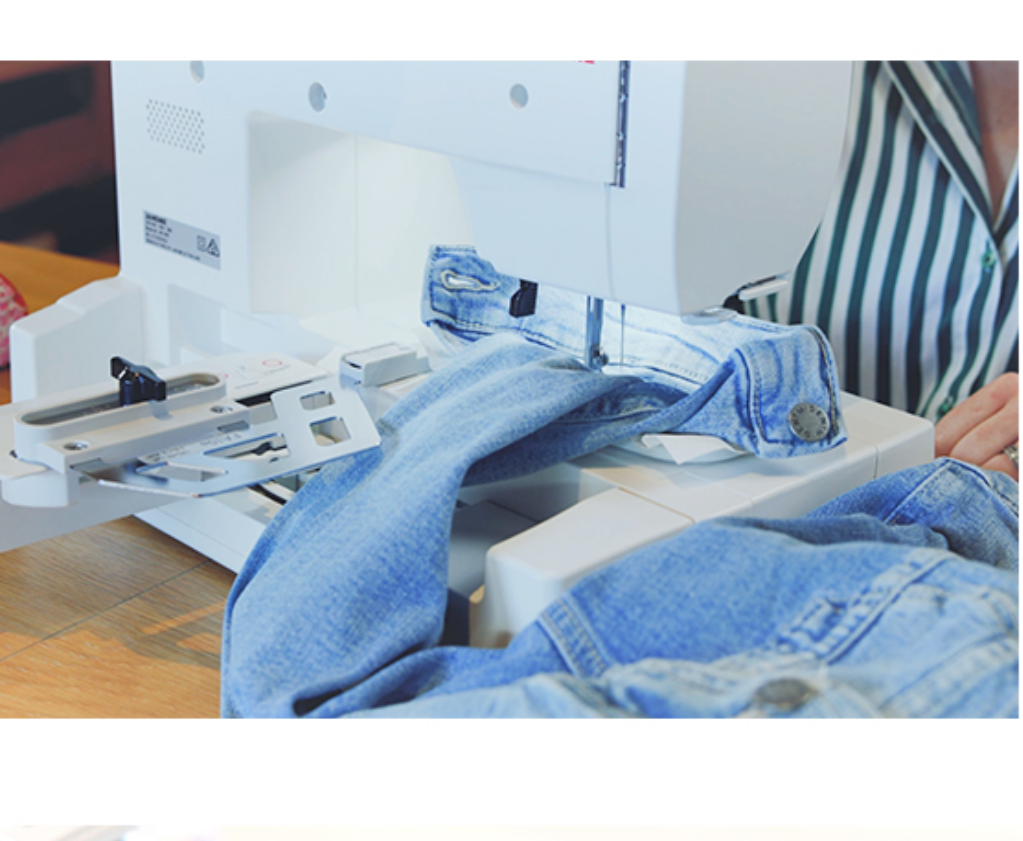
Janome have thought of everything including a

Swing-out embroidery arm



This allows for free-arm capability enabling easy embroidery on sleeves, pockets, socks.

And a bonus to that is a compact foot print! The size of the Memory Craft 1000 is actually smaller than a piece of A3 paper, yet offers a large workspace of 180mm to the right of the needle.

Winding the bobbin is a simple process delivering evenly wound bobbins with optimal tension.

When it comes to inserting your bobbin, you just have to follow the arrows and the excess thread is cut-off ready for sewing.

The Memory Craft 100E features a solid Aluminium Diecast Frame for stability, minimal noise and vibration, optimal stitch quality and maximum workspace.

Its innovative construction and technology makes the machine lightweight yet sturdy. At just 10kg, Memory Craft 100E is manageable and easy to transport to classes and retreats without compromising on quality.
