

Cloth Baby Shoes

SEWING TUTORIAL

FOR PERSONAL USE ONLY

The shoes in this tutorial feature Michael Miller Fabrics.

Cloth Baby Shoes | 0 - 6 MONTHS

MATERIALS:

- _bonded fleece (imitation shearling-suede on one side, fleece on the other) for the sole.
Can be substituted with two layers of fleece, felt, sherpa, canvas or other thick fabric.
- _Coordinating fabric for top, heel, lining
- _Medium weight fusible interfacing
- _1/8 in. wide elastic 18 inches total

To make **ONE** shoe, you will need

- 1 sole
- 1 top**
- 1 top lining**
- 1 heel**
- 1 heel lining**
- 9 inches of elastic

*All items in bold need to be interfaced with fusible interfacing

1 PREPARE THE SOLE (OPTIONAL)

If you wish, cover the bottom of the sole with a coordinating fabric. To do this, simply machine baste the fabric to the bottom of the sole. Make sure to sew as closely to the edge as possible.

2 PREPARE THE TOP

Sew the top and top lining right sides together along the straight edge. Iron the seams open as in the picture.

Cloth Baby Shoes | 0 - 6 MONTHS

3

Fold the top piece down over the lining with right sides facing out. Iron to make sure the seams lay flat. Top stitch along the straight edge 1/4 in. down from the edge. Mark the openings for the elastic. Using a seam ripper, rip the openings in the lining piece being careful not to rip the front top of the shoe or the top stitching.

4 PREPARE THE HEEL

Sew the outer fabric and lining right sides together along the straight edge. Iron the seams open. Fold the sides of the heel in 1/4 of an inch and iron down, as in the picture.

Cloth Baby Shoes | 0 - 6 MONTHS

5

Fold the top piece down over the lining with right sides facing out. Iron this all down. Sew the edges together. Sew slowly, as this is rather thick.

6

Fold down the top of the heel approximately 1/2 in. to make a casing for a 9 inch piece of elastic. Sew closely to the edge, taking care not to sew through the elastic.

During sewing, the fabric may have shifted a little. Check to see if the bottom edges match up. If they don't, trim them.

7 ASSEMBLE THE SHOE

Mark the centers (top and bottom) of the sole. With right sides together, match the center of the top with the center top of the sole.

Starting at the midpoint, sew around the OUTSIDE EDGE of the shoe. (If you start sewing the inside edge it makes it very difficult to line up the other side.) Flip the shoe over, start back at the midpoint and ease stitch the inside edge of the shoe.

You will need to stop every few stitches with the needle down to raise the presser foot and adjust your fabric as you sew.

Cloth Baby Shoes | 0 - 6 MONTHS

8

To attach the heel, line up the center back of the heel with the center bottom of the sole, right sides together.

Once again, starting at the midpoint, ease stitch down around one side and then flip the shoe over to sew the other side.

9

Using tweezers pull the elastic through both slits. Pull the elastic tight. Line up both ends of the elastic and measure off 1.75 to 2 inches. Mark this point with a pin. With the machine, sew back and forth several times to secure the elastic. Cut the excess elastic and rotate it so that the raw edges of the elastic are concealed inside the casing.

10

Use pinking shears to trim off the excess fabric around the shoe. Turn your shoe right side out. Now make another one.

CONGRATULATIONS! You've just made yourself a cute pair of cloth baby shoes. When you're done, find a sunny spot for a photo shoot and post your photo to the flickr group.
