| **Softaway (tearaway)**         | 55gsm, 20" x 10yd roll, Non-woven polyester, wood pulp, PVA, perforate and tear away easily.
| **Fusible Softaway (tearaway)** | 55gsm, 20" x 10yd roll, Non-woven polyester, wood pulp, PVA, olefin, fusible layer, tear away easily and cleanly.
| **Cutaway**                     | 80gsm, 20" x 10yd roll, Non-woven polyester, universal stabilizer, use under stretchy knitted fabrics (e.g. polos and sportswear).
| **See-through cutaway**         | 20" x 10yd roll, Non-woven polyester, lightweight, soft drape and opaque fabrics.
| **Fusible see-through cutaway** | 20" x 10yd roll, Non-woven polyester, low-melt adhesive, fusible layer.
| **Iron-on paper**               | 35cm x 20m roll, Polymer-coated paper, prevent unstable fabrics losing shape during hooping.
| **Washaway**                    | 50gsm, 20" x 10yd roll, Water-soluble non-woven PVA, support stitches during embroidery.
| **Supersolv**                   | 35 micron, 20" x 10yd roll, Water-soluble PVA film, hold down the nap of the fabric.
| **Double-sided tape**           | 6mm x 50m roll (clear), 15mm x 18m roll (yellow), Clear low-tack or yellow high-tack, tape used to embroider fabrics without hooping.
| **Hot melt web**                | 12" x 10yd roll, Non-woven polyamide, clear, iron-on webbing to bond fabrics together.
| **Hot melt film**               | 12" x 5yd roll, Polyolefin film, clear, heat-set film, ironed on to an embroidered design.
| **Pellon Peltex ultra firm fusible** | 50cm x 100cm pre-cut lengths, Non-woven polyester, ultra-firm single-sided fusible.
| **Filmoplast adhesive embroidery paper** | 100cm x 100cm pre-cut lengths, Non-woven cellulose, synthetic fibre, solvent-free glue, non-heat bonding of fabrics before embroidering.

*Think twice about tear for something you wear, anything well-worn shouldn’t be torn.*
