## Apprentice Sewing Machine Technician – Full-Time

### Role Profile

We are seeking a motivated and committed individual with a desire to build a career servicing, maintaining and supporting domestic and industrial sewing machinery.

As an apprentice sewing machine technician, you will work under the supervision of an experienced team and learn how to set up, troubleshoot, and service various types of sewing machines, both domestic and industrial. You will also learn how to read and interpret manuals, work orders and specifications, as well as how to use tools and instruments to perform repairs and preventive maintenance.

Additionally, you will develop a solid understanding of textiles, fabrics and garment construction along with an ability to communicate and support end users in the correct operation of their equipment.

### Your Qualifications

You'll be starting a four-year apprenticeship in Appliance Servicing, consisting of both on-the-job training and classroom instruction. Upon successful completion of the program, you will receive a Certificate III in Appliance Service and be able to work as a sewing machine or electrical/refrigerated appliance technician.

Our family business is known for its inclusive, fun culture and passion. We have one of the largest service centres for domestic sewing machines in the country run by a team with exceptional depth of knowledge and experience. With a chronic shortage of technicians in the industry, your apprenticeship will open long-term career prospects.

### Essential Attributes

- Be an Australian Citizen or permanent resident
- Be willing to commit to a four-year apprenticeship
- A high school certificate or equivalent
- Have or will obtain an open drivers license
- Be physically fit and capable of lifting and handling heavy sewing machines
- Competent English and mathematics skills
- Mechanical aptitude and problem-solving skills
- Care and attention to detail is essential
- Ability to work in a team and communicate effectively
- Willingness to learn and adapt to new technologies and methods

### Apply
