

000323. Halloween Skeleton Costume

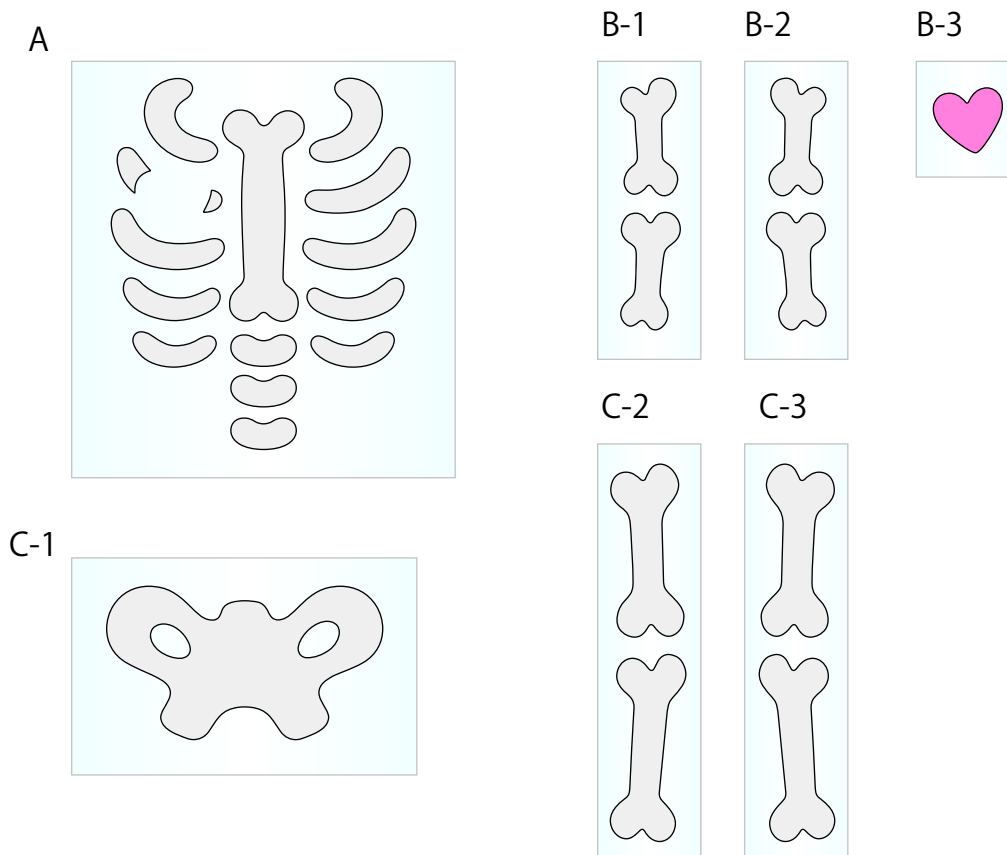

Material

Iron-on transfer sheet – 2 kinds
 Sweatsuit (solid black, child's size 90 cm) – 1 set
 Iron
 Press cloth or silicone paper

Please note: When cutting multiple materials with different thickness and hardness, do not cut them all at the same time. For the most accurate cut, separate your materials by thickness and hardness, and then cut by material type. This ensures that each cut is through the same thickness and hardness of material, resulting in a consistent cut.

(1) With the adhesive side facing up, attach the iron-on transfer sheet to the Standard tack adhesive mat, horizontally flip A through C, and then cut them out. (For details, refer to the instructions included with the sheet.)

(2) Place the transfer sheets from step (1) on the sweatshirt and pants as shown below, and then iron them on. Transfer B-3 after A. (For the temperature setting and ironing time, refer to the instructions included with the sheet.)
